LEYDIG, VOIT & MAYER, LTD.

Jeffrey A. Wyand,
Registration No. 29,458

Figure 1 consists of 12 bar charts, labeled (a) through (l), each representing a different treatment group. The y-axis for all charts is 'Percentage of total protein' ranging from 0 to 100. The x-axis for all charts is 'Fraction' with labels A, B, C, D, E, F, G, H, I, J, K, L. The treatments are: Control, 100 mg/kg, 200 mg/kg, 400 mg/kg, 800 mg/kg, 1600 mg/kg, 3200 mg/kg, 6400 mg/kg, 12800 mg/kg, 25600 mg/kg, 51200 mg/kg, and 102400 mg/kg. The charts show that as the treatment dose increases, the percentage of protein in fractions A, B, C, D, E, F, G, H, I, J, K, and L generally decreases, while the percentage in fraction L increases.
